

# Arlington Combo – Assembly Instructions

## Assembling the Combo

Remove lid by lifting the locking handles and sliding towards the centre.

Using the side handles raise each side panel one at a time.

Make sure each panel is firmly locked into position.

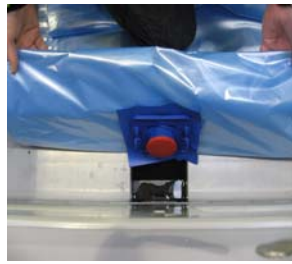

Replace Combo lid after filling and move locking handles into closed position.

## Fitting the Liner

Place folded liner in the bottom of the Combo, ensuring the outlet port on liner is next to the outlet port on Combo.

Move the outlet port on liner towards the outlet port on Combo.

Make sure you locate the clip surrounding the outlet port on liner securely into the Combo's outlet port.

Ensure the inlet port is on the top of the liner. Do not unfold the liner. Begin to fill. The only adjustment required during the fill is to ensure the corners of the liners are pulled towards the corners of the box.

## Attaching the Coupler and Filling the Combo

Attach the 2" cam adaptor to the inlet port at the top of the liner.

Cam adaptor attached.

Attach cam lock to adaptor and secure by lifting the locking arms.

Hose fill adaptor needs to be screwed into cam lock to complete fitting.

## Filling the Liner

This photograph shows a hose adaptor filling a liner.

Drop gate Combo with liner being filled

## Fitting the Outlet Tap

Pin cutter shown on right of photograph needs to be inserted into outlet tap before tap is fixed to outlet port on Combo.

Outlet tap is screwed into outlet port on Combo and pin then pierces seal of outlet port on liner.

## Security Tags

This photograph shows where the security tag should be placed on the locking handle.

To remove the security tag, cut as shown above.
